Learn Chess Through Amazing Games

Chess is like a fun puzzle that two players solve together! Every piece has its own special way of moving, and every game tells its own little story — full of clever plans, surprising traps, and exciting moments.

In this book, you will follow real games move by move. You'll see when a King is in danger, when a sneaky FORK attacks two pieces at once, and when a brave little Pawn marches all the way to become a Queen! After every game, there's a "What Did We Learn?" section to help the lesson stick — and some fun quizzes to test your chess brain.

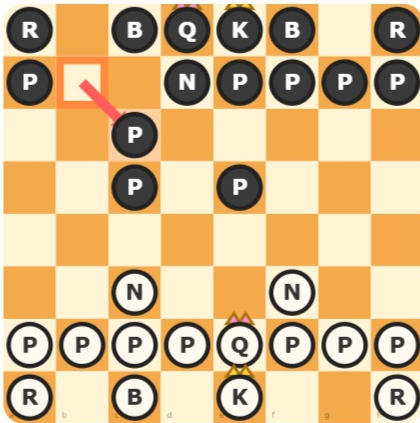

Grab a chessboard if you have one, follow along with the diagrams, and get ready to have fun learning chess — one game at a time!

Final Chess Tips for Kids

-  Protect your King early — castle when you can!
-  Try to control the four center squares with your pawns and pieces.
-  Don't move the same piece twice in the opening — bring new pieces out!
-  Always check: is any of my pieces in danger right now?
-  Look for checks, captures and threats before every move.
-  A Knight on the edge of the board is not as strong — knights love the center!
-  Think before you move — a calm mind finds the best plans.
-  Every mistake is a chance to learn something new. Keep playing and have fun!
